Forms Quiz

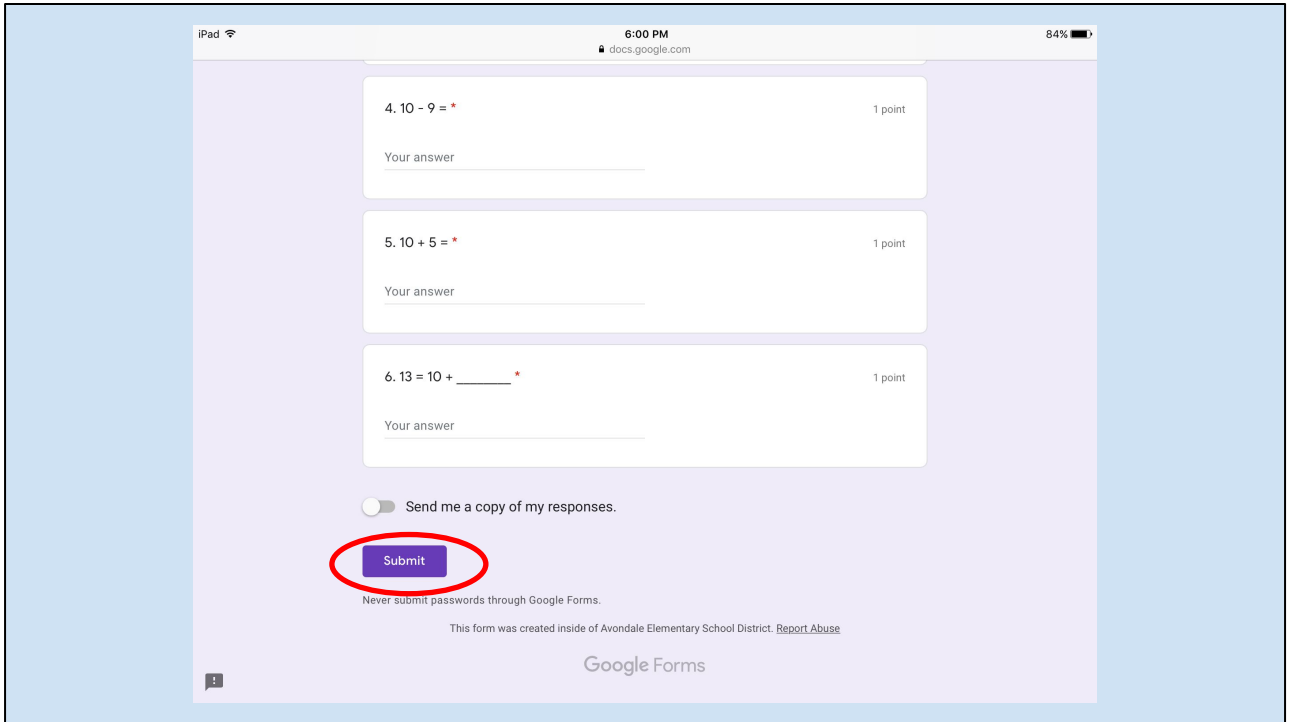

Click on the assignment.

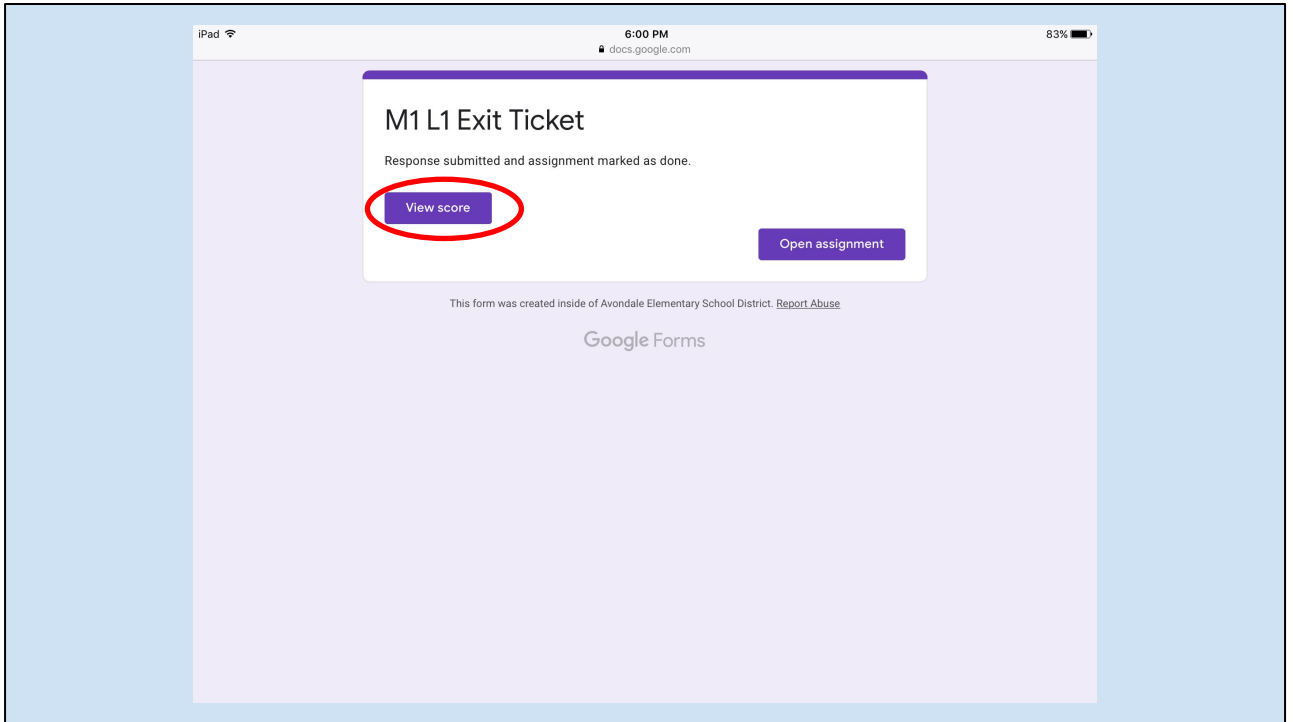

If the assignment is a Forms quiz, then you will see it right here.

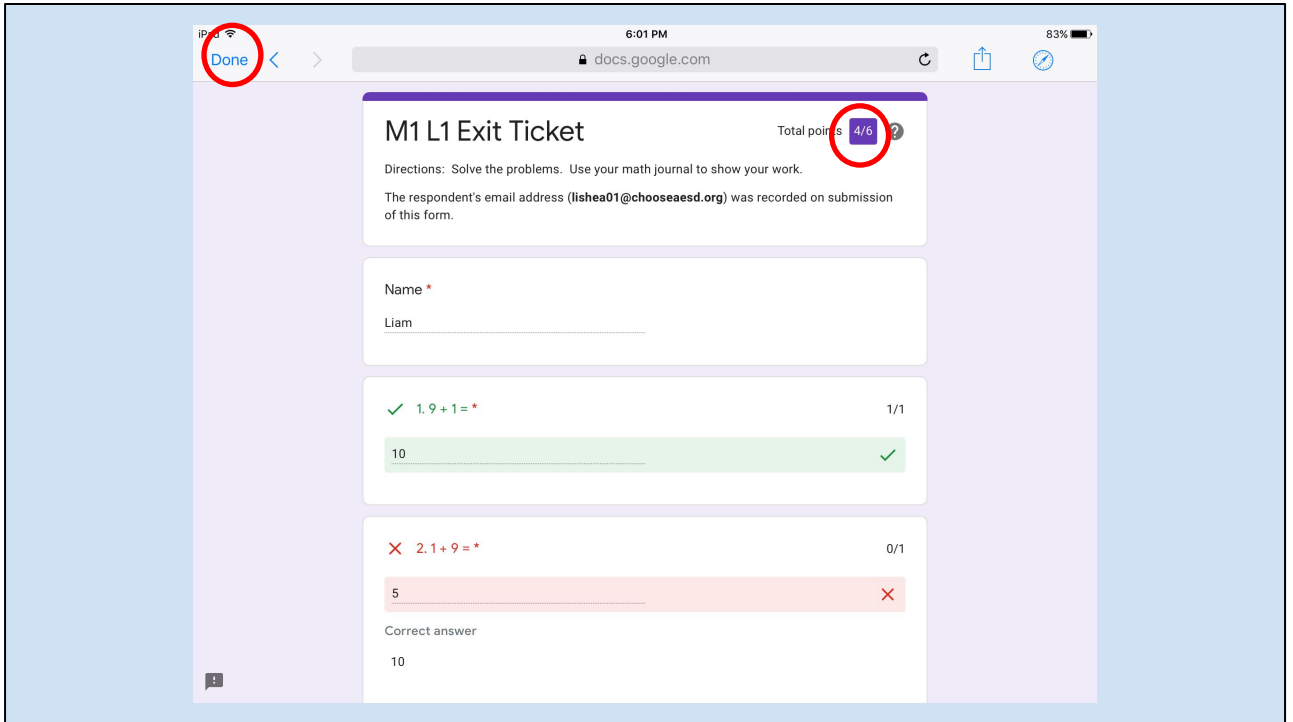

This is what a Forms quiz looks like. It might be a short answer like this one. Or it could be multiple choice. You can even upload a picture (we will talk about that one later.) You always have to put your name at the top or you cannot submit it.

At the bottom of the quiz is the Submit button. If it does not submit, you did not answer something so go back and look for what is missing.

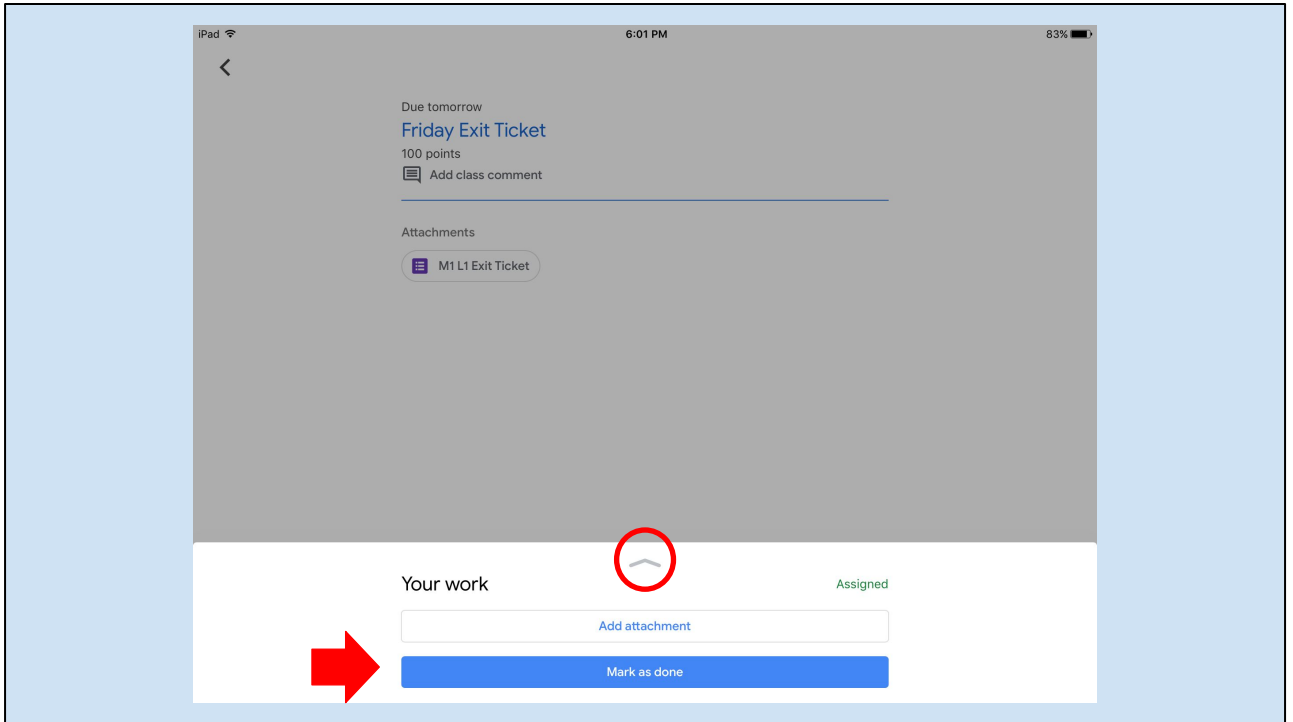

When you click the submit button, you will see this page. Click on the View Score button.

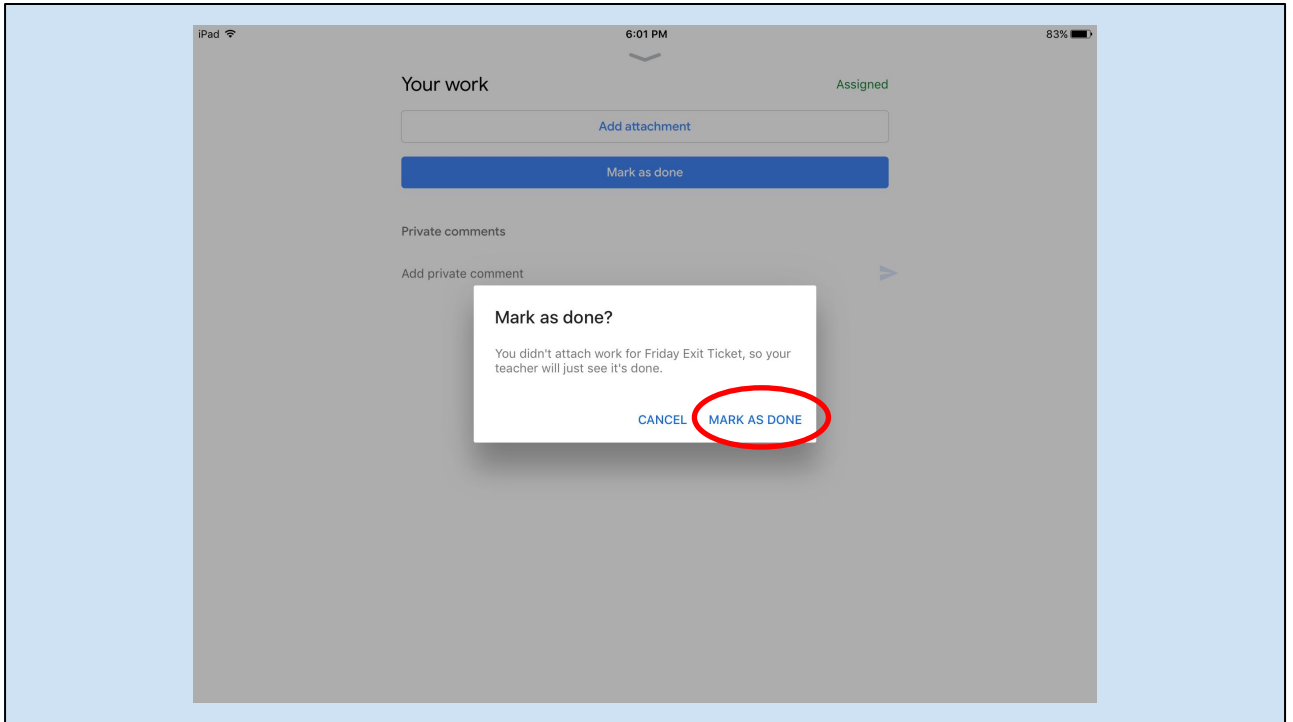

You will see the quiz. The green highlighted questions you got right. The red highlighted questions you got wrong. Look over the red questions to see what the right answer is and see if you can figure out why you got it wrong.

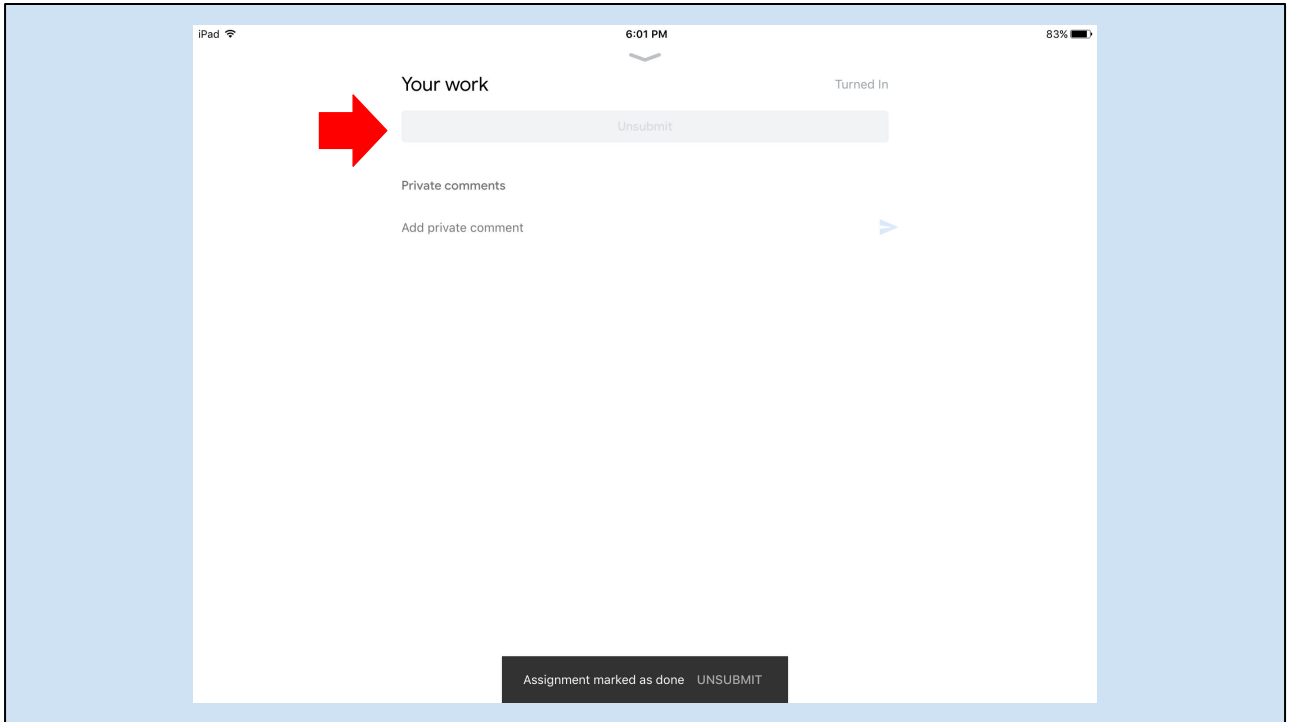

At the top of the page, you will see your total score. When you are finished looking at your answers, click DONE at the top of the screen.

You will go back to the assignment page. Click on the arrow so you can Mark as Done.

Again, click Mark as Done so I know you finished the quiz.

Once you have marked it as done, you will see the unsubmit button.
